Silicea Toning Moisturizer with colloidal Silica and Aloe Vera: Available in 150 ml

Product benefits by category:

- GOLD** Anti-aging, Body Care & Topical Use, **Skin**.
- SILVER** Antioxidant, Detoxification.
- BRONZE** General Prevention.

Exclusively imported from Germany, Silicea Toning Moisturizer is perfect to help moisturize, tone and soothe all skin types. Featuring colloidal Silica and Aloe Vera, study results show a 43% increase in skin moisture after 4 days of application. It's a fast absorbing, oil free, gentle care solution for the face and body!

What does Silica do? An aqueous compound of oxygen and silicon – silica is a natural, elemental substance essential to all living things. It's nature's building block. Research has proven that silica plays a vital role in the human body by strengthening the connective tissue, skin, hair and nails. Unfortunately our body's supply of silica eventually depletes as we age and is not easily regenerated. Silicea toning moisturizer contains silica in a liquid "colloidal" form that allows it to be absorbed by the body faster helping to prevent and reduce signs of aging such as wrinkled skin.

Aloe Vera - or "true aloe" - contains over 200 different ingredients, such as: vitamins, minerals, amino acids, enzymes, polysaccharides, and much more. Essentially this means it's packed full of vital nutrients that your body needs. Aloe Vera provides useful healing qualities. It is a highly effective moisturizer and an anti-inflammatory. Aloe Vera has a high amount of Vitamin E which is excellent for the skin. It helps to maintain the skin's elasticity and keep the skin slender and moisturized. Aloe Vera also contains Vitamin A & C, which is responsible for bringing luster to the skin. Aloe Vera, when actuated, increases the availability of oxygen, thus helping to strengthen the skin tissues. The Aloe Vera in Silicea Toning Moisturizer helps combat dryness of the skin. It keeps the skin well hydrated and helps stop it from becoming parch and scaly. It can aid in lightening dark spots on the face and reduce the intensity of pigmentation.

Directions:

Apply to effected areas and massage gently. For extra dry skin follow use with a final oil based cream.

Ingredients:

Water, Hydrated Silica, Pentylene Glycol, Squalane, Aloe Vera Gel, Carrageenan, Amorphophallus Konjac, Phenoxyethanol, Perfume, Citric Acid.

- for face and body
- fast absorbing
- gentle care
- oil free

Application study confirms:

43% higher skin moisture after 4 days of application.

Study conducted by Dermatist Institute Münster, Germany (March 2004) with Silicea Toning Moisturizer in comparison to untreated skin.
